UX Standards

UX shoulder check

All developers are expected to reach out to the UX team for **UX shoulder check** before the Jira is marked as done. Please book a time with the relevant UX.

Accessibility testing

All developers are expected to do **basic keyboard accessibility testing** (ie keyboard accessibility and zooming in/out), ideally **before** the UX shoulder check.

W1C Accessibility Requirements

Accessibility area	Simple keyboard accessibility testing
Tabbing and focus	1. All key user tasks can be completed using keyboard alone. 2. Able to [Tab] into and out of all interactive elements. • Users should be able to navigate through the application's user interface by pressing the **Tab** key to move forward and **Shift+ Tab** to move backward. • Ensure there are no "keyboard traps" where users can get stuck on an element and cannot navigate away using the Tab key. 3. Able to close modals/popups and drop down menus using [Esc]. 4. Keyboard focus is visible and you can see where you are on the page at all times. • A visual indicator (e.g., a highlighted outline) should clearly show which element is currently focused, helping users understand their current position. • When a modal is displayed, the focus should move to the modal. • When a new tab is opened or selected, the focus should move to the new tab. 5. Keyboard focus order is logical and matches the visual ordering of the page. • The tab order should follow a logical, predictable sequence, typically top-to-bottom and left-to-right for most interfaces.
Resizing the interface	1. All text on the page gets larger. 2. Content doesn't disappear, overlap or get cut off. 3. All buttons, form fields, and other controls are usable. 4. Horizontal scrolling is not required to read sentences.

GEL

We will use the following configuration as standard for Westpac One Core

GEL: Westpac Design Language

https://gel.westpacgroup.com.au/

Gel Next: Common library which provide reusable react UI components which implements above spec

https://gel-next-storybook.vercel.app/?path=/docs/components-accordion–docs

Component	Gel Next Component	G

Page card	Custom component with a layout card which has configurable min/max width, with defaults, has 12 column grid and a configurable 2 column Page Title Page card will have: • a **title**: Must be H1. **Optional** • **secondary information**: **Optional** • a divider: **Optional** • **24px** padding on all sides	Pag Pag **Wi** **Na**
General spacing and Margin Guidelines	Refer to: https://gel-next-storybook.vercel.app/?path=/docs/foundation-spacing–docs Current px value equivalents to be followed are listed below. Try not to override styles instead use tailwind classes defined. **Pixels** / **REM equivalents** 4px / 3px (0.1875rem) 8px / 9px (0.5625rem) 16px / 15px (0.9375rem) 24px / 24px (1.5rem)	

Heading

Refer to:

https://gel-next-storybook.vercel.app/?path=/docs/foundation-typography–docs

https://gel-next-storybook.vercel.app/?path=/docs/foundation-colours--docs

Use: **Body Font, <u>not</u> Brand Font**

Heading	Token	Font size	Line height	Font weight	Font colour
Heading 1	body-6 (**typography-body-6**)	30px (1.875rem)	1.2 (**tight**)	400 (**font-normal**)	#1F1C4F (**text-heading**)
Heading 2	body-7 (**typography-body-7**)	24px (1.5rem)	1.2 (**tight**)	400 (**font-normal**)	#1F1C4F (**text-heading**)
Heading 3	body-8 (**typography-body-8**)	18px (1.125rem)	1.4 (**normal**)	400 (**font-normal**)	#1F1C4F (**text-heading**)
Heading 4	body-9 (**typography-body-9**)	16px (1rem)	1.4 (**normal**)	400 (**font-normal**)	#1F1C4F (**text-heading**)
Heading 5	body-10 (**typography-body-10**)	14px (0.875rem)	1.4 (**normal**)	600 (**font-semibold**) TBC	#1F1C4F (**text-heading**)

All headings should use font colour: **text-heading**

Text

Refer to: https://gel-next-storybook.vercel.app/?path=/docs/foundation-typography--docs

Heading	Token	Font size	Line height	Font weight	Font colour
Normal text	typography-body-10	14px (0.875rem)	1.4 (**normal**)	400 (**font-normal**)	#181B25 (**text-text**)
Label	typography-body-10	14px (0.875rem)	1.4 (**normal**)	500 (**font-medium**)	#181B25 (**text-text**)
Hint	typography-body-10	14px (0.875rem)	1.4 (**normal**)	400 (**font-normal**)	#595767 (**text-muted**)

Do **<u>not</u>** use H5 for labels.

Labels should use: **body-10**, **font-medium**, **text-text**

Normal text should use: **body-10**, **font-normal**, **text-text**

Not

Button

https://gel-next-storybook.vercel.app/?path=/story/components-button–sizes

Always use the **small** size.

Siz

Form field	https://gel-next-storybook.vercel.app/?path=/docs/components-form–docs https://gel-next-storybook.vercel.app/?path=/docs/foundation-field–docs Unsure which component we should use.	Spa Lab
Amount field	https://gel-next-storybook.vercel.app/?path=/story/components-inputgroup--fixed-widths Use **Input group** component and used a **fixed width**. Set **width = 10** so that it fits **100,000,000,000.00** without wrapping.	wi
Input field or Textarea with characters count	https://gel-next-storybook.vercel.app/?path=/story/components-inputgroup-scenarios--textarea-with-character-count • Use the Input group component. • Use the "supportingText" setting for the character coun**ts.** • **Ensure we can set the** maximum number of characters so that user is unable to type in more characters • Ensure we are able to set different character sets, eg UTF 8 (which includes emoji and foreign characters) and printable ASCII characters. • Copy/Paste should remove any unsupported characters and the character count should reflect any characters automatically removed • Ensure that for a Textarea, user can only r**esize the height, not the width** • Ensure the **Width** is set to either **Full** (default) or a number: 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 20 | 30 | "full"	
Default bottom margin	Default is **30px** for input groups.	
Statuses	https://gel-next-storybook.vercel.app/?path=/docs/components-badge--docs Use the **default** badge component (with square border), **not** the **pill** component (rounded borders) Use **Soft** variation for: Soft danger faint hero info neutral muted primary success warning And info	

Progress indicator /Spinner	• Use the **medium** size
General spacing and size guidelines	While the values specified here are pixel values, you should still use the relative Tailwind classes which match the pixel values specified here. These values assume the user's font size is set to 100%. The Tailwind classes will set the spacing to rem values that adjust with the user's font size setting. Use the GEL's Spacing table to easily find the matching Tailwind class. **Font size** • Card tile: Use <H1> - **30px** • Section name: Use <H2> - **24px** • All labels: **16px**. Do not use a heading tag to format values • All hint text: **14px** • All inline error: **14px** • Value in all input field: **14px** **Spacing** All spacing is a multiple of 3. • **24px** on all sides of the card • 15px between the card title and the divider. • **12px** between a field label, hint text, inline error and input field • **6px** between the input field and secondary information (eg 35 remaining) • **15px** below each input field. This is GEL Next default. • ~~**30px** below each input field. This is GEL Next default.~~ **Buttons** • Use the **small** size: Height = **30px** • **9px** between buttons

http

Alert boxes	• Any **bold text** should use **font-semibold** class - (font-weight = 600) • Any **hyperlink** should be underlined and use the **same font text colour** as the rest of the tex in the alert box. • Set **iconSize** to **Small, 18x18px** https://gel-next-storybook.vercel.app/?path=/docs/components-alert–docs

W1 enablement / MFE refactoring
